Policy

## Health, Safety, Environment, Community / Heritage Policy

Since Lang Hancock's Flight of Discovery in 1952 and the formation of Hancock Prospecting Pty Ltd (HPPL) in 1954, the Company has had a long and important history in minerals exploration.

Going forward the Company will continue to explore and develop mineral resources for the benefit of Australia and to support the economic future of developing nations.

In carrying out exploration activities, HPPL is committed to continue developing a positive culture where we are responsible for our actions at all levels of the business.

We are committed to achieving high levels of Health, Safety, Environmental and Community / Heritage performance and acting at all times in a responsible manner and with respect for Aboriginal people through the application of the Hancock Integrated Management System (HIMS) by:

- **Complying** with legislative requirements
- **Working Safely**
- **Working Responsibly**
- **Continuously** improving performance

As the Company expands its activities to new locations and into new commodities we will ensure that HIMS remains appropriate and relevant for the exposures being managed.

Everybody is personally accountable for their own Health, Safety, Environment and Community / Heritage performance and for the Performance of those who they work with, manage and supervise.

Gina Rinehart  
Chairman
