CLARIFICATION

SOCIETE GENERALE WORK PACKAGE

GVK Hancock has been working with Societe Generale on a specific element of the financing arrangements for our projects, but is not currently working on that specific work package and as such does not require their services at this time.

The key focus for our projects at this point in time is finalising our approvals and addressing litigious challenges to our attained approvals.

Once we have finalised approvals we will then execute coal off-take agreements and work to finalise financing arrangements.
